

Binowee

SUSTAINABLE LIVING ENTWINES WITH NATURE

"Binowee" a place where sustainable living entwines with nature to create the perfect lifestyle where sensitively designed architecture complements and embraces natural light, open green space, bushland and rainforest settings existing in the locality.

Whilst conveniently located in the Central Coast suburb of Springfield, just minutes away from Erina Fair Shopping Complex, the cosmopolitan hub of Terrigal and the CBD of Gosford, "Binowee" remains well connected with the surrounding natural setting.

"Binowee" presents an exceptional opportunity for those who wish to experience a connection to nature and sustainable living. Binowee's house and land package is a conscious strategy to ensure a harmonious integration with the existing amenity, utilising the full potential of each lots' aspect to maximise privacy. An integrated and holistic approach during the design phase has also been incorporated to encourage the reduction of negative impacts on our environment and well-being of residents, therefore making "Binowee" a superior choice for present and future generations.

TEAM

The team is dedicated to making a positive contribution to the Central Coast's culture and lifestyle whilst showcasing sustainable living at its' best, developer, Meadow Road Pty Ltd, has brought together an accomplished architect in Sue Connor Architects and builder, Sustainable Design & Construct Pty Ltd who share the same unique collaborative vision.

DEVELOPER/BUILDER

Meadow Road Pty Ltd - Developer

Sustainable Design & Construct Pty Ltd - Builder

Our Mission

To create happy, healthy, sustainable, authentic quality spaces that will redefine traditional processes through innovation and respect for resources used while providing security for our strong, talented & motivate team.

ARCHITECT

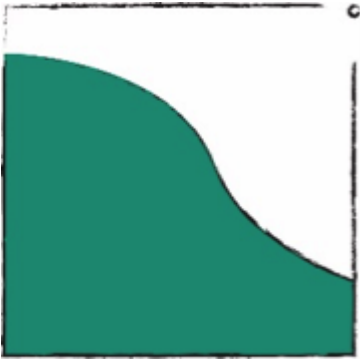

Sue Connor Architects

Sue Connor Architects is committed to the principles of ecologically sustainable architecture from early design stages through to occupation. Our philosophy is to create buildings that are energy efficient, comfortable to live in, have a strong sense of place and sit in harmony with the natural environment. We feel ecologically sensitive architecture is vitally important for us to create a sustainable future society.

Sue Connor Architects recognises the uniqueness of every client, project and site. Our ethical approach considers the impact built-form has on people and the environment in all aspects of the design and documentation process. We will reflect your vision to create innovative, ethical and practical architecture.

BIO

Enthusiastic, highly organised and a possessing a wealth of experience, Alan Bowler is passionate about the area he lives and works in.

Alan's connection to the Greater Gosford area runs deep: his mother established a local real estate business, and Alan has inherited a passion for the area and its people from her. Alan began working in real estate at only 17, and this gives him an incredible insight into the local property market and clients' needs. After participating in over 1,500 property transactions and selling in excess of \$400 million dollars worth of property, Alan can justifiably claim to have an unrivalled understanding of property in the Gosford area.

Alan is the principal of McGrath Gosford, and he's now in a position to pass his knowledge onto his team. He explains that "having over 30 years in real estate gives you an insight into the important part you can play in helping people at every stage of their lives.
